

Retaining Walls - Parkwall® Wedge Cap

The Parkwall® Wedge Cap is a symmetrical wedge shaped coping unit, suitable for straight or curved walls without cutting. They are complete with a series of notches on the bottom to interlock to Parkwall®, and have a smooth overhang edge on both sides that can be split for a textured effect.

DIMENSIONS

Length: 200 mm (7.87") tapered to 175 mm (6.89")
 Height: 75 mm (2.95")
 Depth: 325 mm (12.79")

COLOURS

Stock colours include: Autumn Range, Blackwood Range, Granite, Laurentian Range, Robinson Range, Sandstone Range, Timmins Range

- Parkwall® Wedge Cap units are sold individually.
- For delivery, part cubes will be shrink wrapped.
- Details are provided in the following table.

Sq.Ft. per Bundle	19
Stones per Sq.Ft.	6.6
Stones per Bundle	126
Ln.Ft. per Bundle	77.5
Pieces per Ln. Ft.	1.63
Weight per Bundle	2898 lb / 1318 kg

ADDITIONAL INSTALLATION INSTRUCTIONS

Placing the units in an alternating pattern creates a straight section.

By placing units with the wide face positioned the same way, curves can easily be laid out. The minimum curve is 2.4m (8'). Radii of greater than or less than 2.4m (8') will require cutting to achieve a tight fitting cap.

90 degree corners can easily be created using two closed end Wedge Caps (there is one closed end unit per layer of Wedge Cap units). To allow Unit 2 to site flat, the interlocking ridges on the underlying Standard Unit (directly below the closed end portion of the Wedge Cap) need to be knocked off.
