

# PMB PRECAST MODULAR BLOCK INSTALLER TRAINING

---

The Precast Modular Block Installer Training course was designed to offer professional retaining wall installers a detailed overview of common worksite conditions and how one can overcome these challenges through the product selection, site preparation and installation technique.

The program is a one day course that typically runs 6-7 hours in length.

All course materials are included and supplied on course day.

The course is completed with a written exam.

This exam is presented in a multiple choice format and a score of 80% or more is a pass.

The contractor will be presented with a certificate of completion.

Typical course cost is \$50.00 per participant, payable in Canadian Funds.

## Content Summary:

Section 1: PMB Wall Systems (Wall Types, Failure Modes)
